SUMMARY

Recent computer science graduate with hands-on technical experience gained through a hands-on internship, including building and integrating software systems from the ground up. Fast learner who adapts quickly to new tools, technologies, and problems, with a strong foundation in analytical thinking and practical problem-solving.

EDUCATION

Imam Abdulrahman Bin Faisal University (IAU)
computer science

08/2021 – 06/2026 | Dammam,KSA

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern

06/2025 – 08/2025 | Dammam,KSA

Kwaidi

- Built a full-stack e-commerce application, connecting a responsive **Vue.js** frontend to a **Node.js/Express** REST API.
- Implemented user authentication and session management using custom middleware for request validation and token verification.
- Designed backend data models and RESTful endpoints for product catalog storage and retrieval.
- Built a purchase-routing system to handle the checkout flow seamlessly from cart to order confirmation.

PROJECTS

Dolani

05/2025 – 05/2026

Indoor Navigation System (Web & App)

- Developed a comprehensive indoor positioning system using hardware beacons for real-time spatial tracking and navigation.

Administrative Metrics Dashboard

09/2025 – 10/2025

Full-Stack Logistics & Role-Based Management System

- Developed a centralized management dashboard to orchestrate inventory tracking, product catalogs, and corporate logistics. It features modular data models for tracking transactional histories across complex Asset, Supplier, Sales, and Purchase entities, while utilizing secure role-based access control and automated off-site cloud data backup pipelines

Moon

06/2025 – 09/2025

E-Commerce Ecosystem

- Built a secure full-stack e-commerce application featuring a responsive custom frontend. It implements middleware-driven user authentication and request validation, while orchestrating purchase-routing workflows to manage state transitions seamlessly from cart to order confirmation.
